- Recording in progress. Slides and recording will be shared with all registrants afterward.
- Please drop questions in the Q&A box.
- Feel free to introduce yourself in the chat – share your name, organization, and where you are joining from.

Today's Agenda

Flow for today's session:

- ☼ **Why Transparency Matters for Manufacturers**
- ☼ **Intro to OS Hub and SLCP**
- ☼ **How SLCP and Open Supply Hub Work Together & Why it matters**
- ☼ **Practical Walkthrough: How to Get and Claim Your OS ID**
- ☼ **Next Steps, Support & Resources**
- ☼ **Q&A & Closing remarks**

The Transparency Imperative

Navigating the New Supply Chain Era

Key Industry Drivers

- ☀️ Climate Action: Demand for Scope 3 Data, Science-Based Targets 🌍
- ☀️ Decent Work: Ethical Sourcing, Responsible Purchasing 🤝

Regulatory Landscape

- ☀️ EU CSDDD: Corporate Due Diligence 🇪🇺
- ☀️ HRDD Legislation: Proactive Due Diligence on Human Rights and the Environment 🌍

This isn't just compliance. It's how the world expects business to be done.

Let's hear from the room!
Please submit your answer in the poll.

Question:

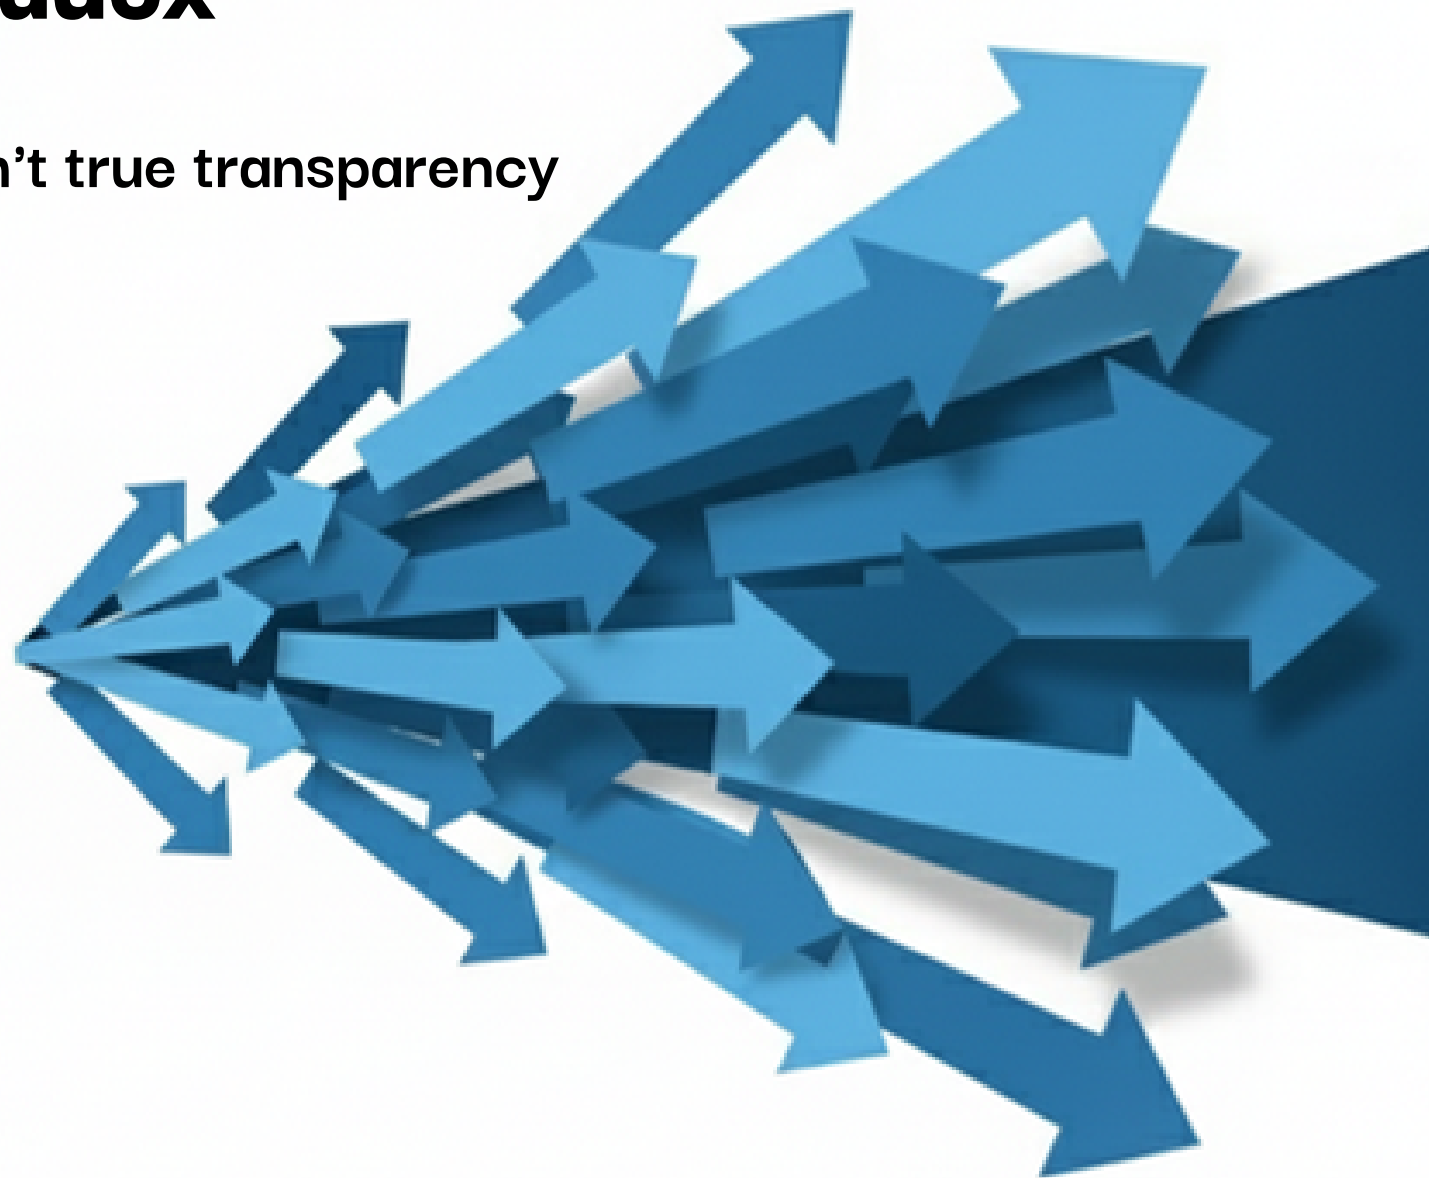

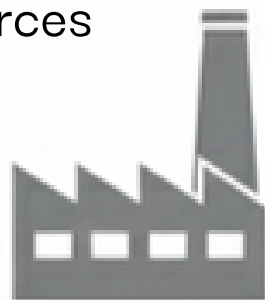

In the last year, how often do you find yourself **providing the same basic facility information** –like your name, address, or certifications– **to different brands or partners** where you'll never see the data again or don't know how it will be used?

Once a year, quarter, month, week or almost every day?

The Transparency Paradox

Transparency to one stakeholder isn't true transparency
- it's siloed information.

- ✱ Endless, repetitive data requests
- ✱ Diverted time and resources
- ✱ Administrative burden

The result is audit fatigue:
a constant drain on your resources.

Let's reframe

Transparency is not a Burden. It's Your Competitive Edge

FROM

**Transparency for
Transparency's Sake**

TO

**Transparency That
Solves Problems**

Transparency as a Competitive Advantage

A powerful tool to move beyond compliance and toward growth

Eliminate Audit Fatigue

Sharing auditing, due diligence & reporting

Showcase Your Capabilities

Increase Discoverability

Proactively Manage Risk

Build Credibility

Three Pillars Make it Work

The Principles Behind a True Solution

Openness & Accessibility

No more hunting down different PDFs and spreadsheets & figuring out who has access to what. Everyone needs to start from the **same base dataset & contributes to keeping it up-to-date & accurate.**

Standardization & Data Exchange

Using different formats & IDs makes it nearly impossible to connect & layer information. We need **standardized data with universal IDs** for each location.

Engagement & Impact

We can't solve problems we can't see & we can't collaborate with people we don't know exist. We need to see **which organizations are connected to build solutions together.**

So, we created

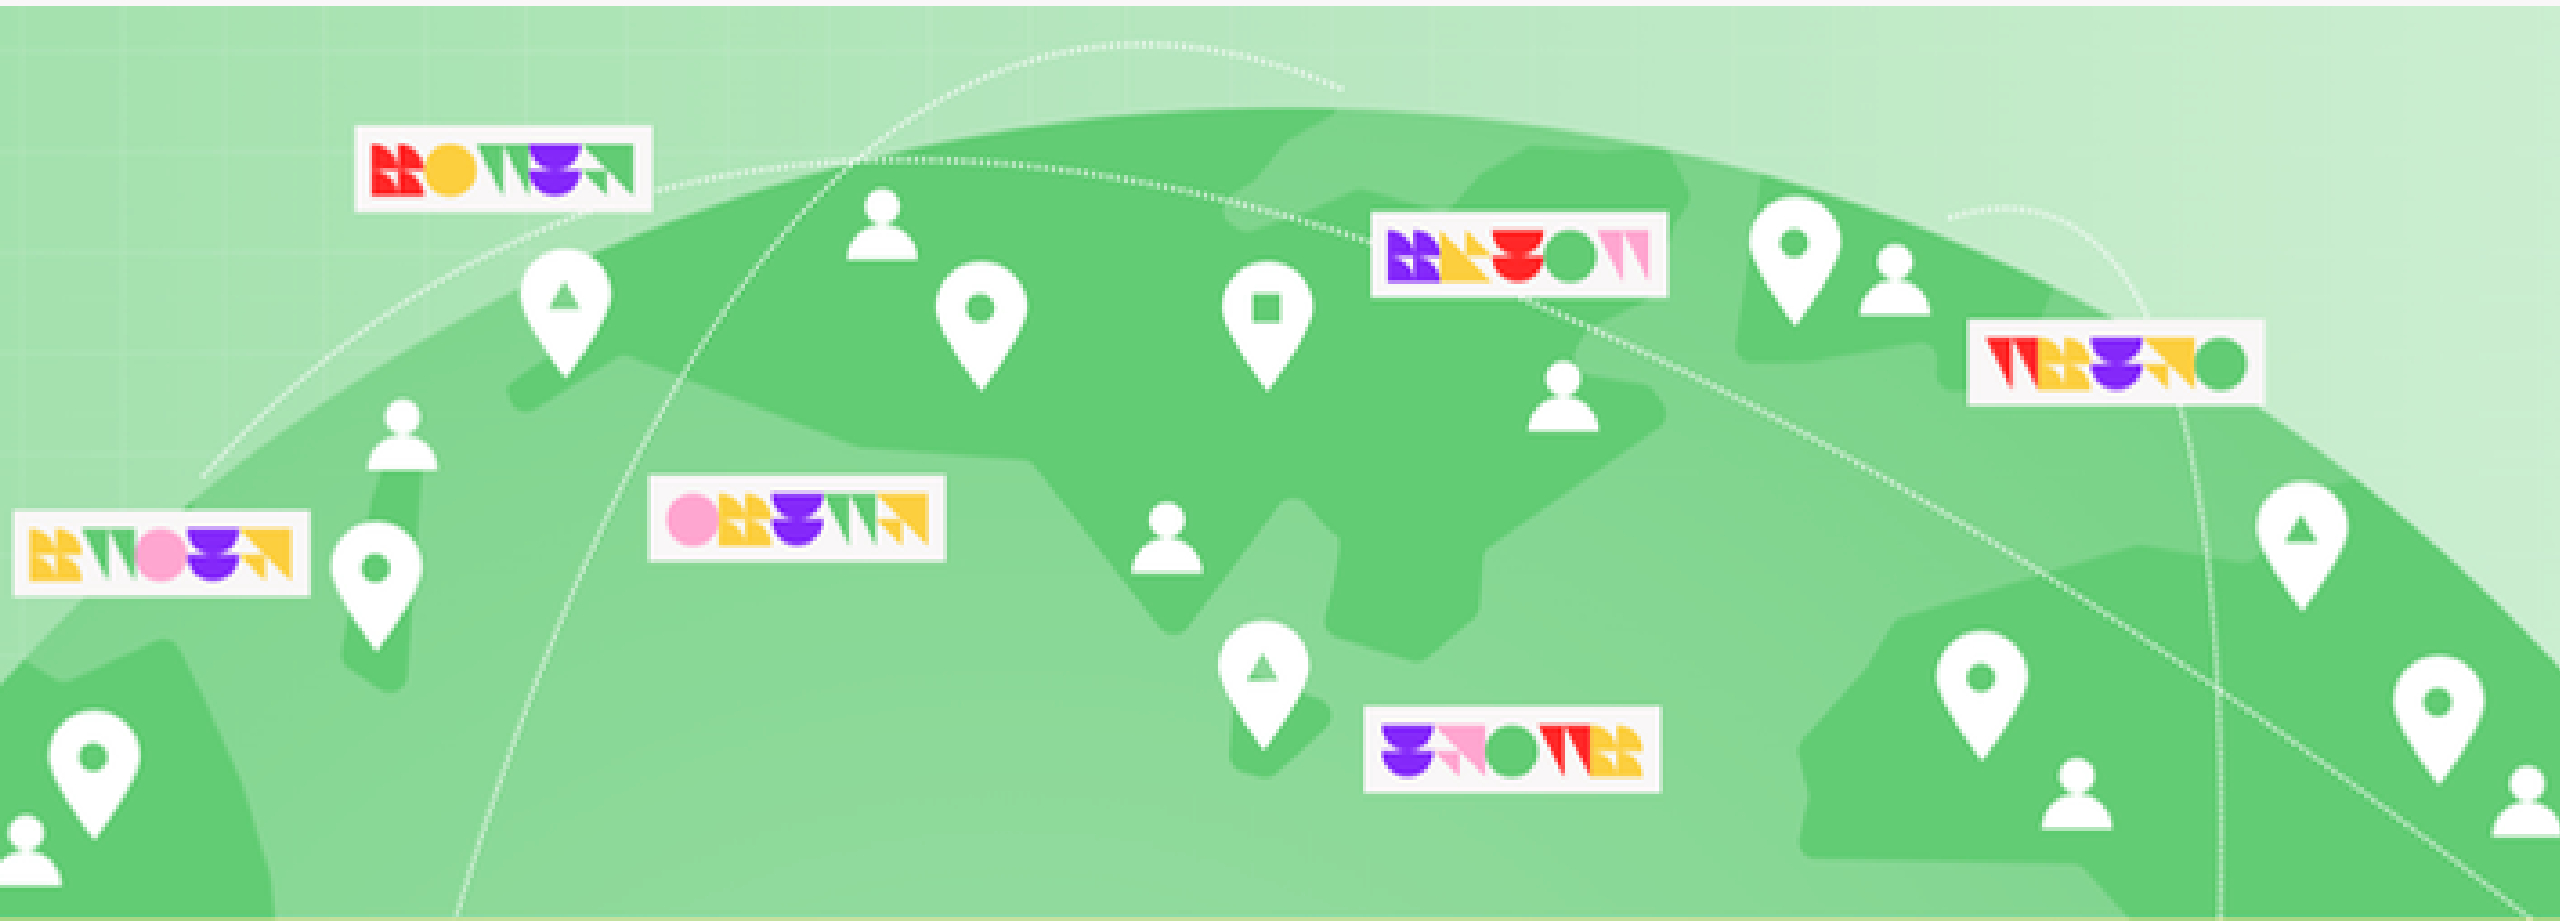

**OPEN
SUPPLY
HUB**

to empower suppliers like you,
turning the call for transparency
into your advantage.

Open Supply Hub (OS Hub) shows where global production locations are and who is connected to them, and makes that data easy for **everyone** to work with. Anyone can search and contribute to Open Supply Hub, **with special workflows for suppliers to take ownership of their data and share beneficial information.**

A Dynamic, Growing Community

2,100,000+

OS IDs

Production locations listed
on OS Hub

3,300+

Data contributors

Brands/orgs/service providers
OS Hub to connect with suppliers

2,900+

Claimed Profiles

Facilities/suppliers to take the
ownership of their data

A QUICK LOOK AT OS HUB

SHARE your data, **DISCOVER** global supply chains, **COLLABORATE** with potential/existing partners

Find overlaps
between supply
chains/datasets

The screenshot displays the Open Supply Hub (OSH) interface. On the left, there is a search sidebar with filters for Facility Name or OS ID, Data Contributor (with 'SLCP' and 'H&M Group' selected), Show only shared facilities (checked), Contributor List, Country Name, Sector, Data Contributor Type, and Parent Company. A yellow arrow points from the 'Find overlaps between supply chains/datasets' text to the 'Show only shared facilities' checkbox. The main content area is titled 'Facilities' and shows a list of 940 results, sorted by '# Contributors'. The list includes entries for Zaber & Zubair Fabrics Ltd, Interloop Ltd HD 2, BONY TEKSTIL ISLETMELERI VE SAN. TIC. A.S., Impress-Newtex Composite Textiles Ltd., MASIHATA SWEATERS LTD, and Echotex Ltd. Each entry shows an OS ID, the number of contributors, and a 'Claimed' status. On the right, there is a world map with green dots indicating production sites. A yellow arrow points from the 'Add Data' button in the top right navigation bar to the 'Share the production sites you are connected to' text. Another yellow arrow points from the 'Have data cleaned and processed through a matching algorithm' text to the map. A third yellow arrow points from the 'Access OS IDs for production sites' text to the map. A fourth yellow arrow points from the 'Search & download cross-sector supply chain data' text to the 'SEARCH' button at the bottom of the sidebar.

Share the production sites
you are connected to

Have data cleaned and processed
through a matching algorithm

Access OS IDs for
production sites

Search & download cross-
sector supply chain data

Being Listed on OS Hub

What does it mean?

It means your company will appear in our open global database of production locations used by brands, retailers, service providers, and other organizations to disclose suppliers and identify new partners.

Once added, your location will receive a free and universal ID (OS ID).

Your location(s) might already be listed on the OS Hub!
(If not, you can easily add it yourself.)

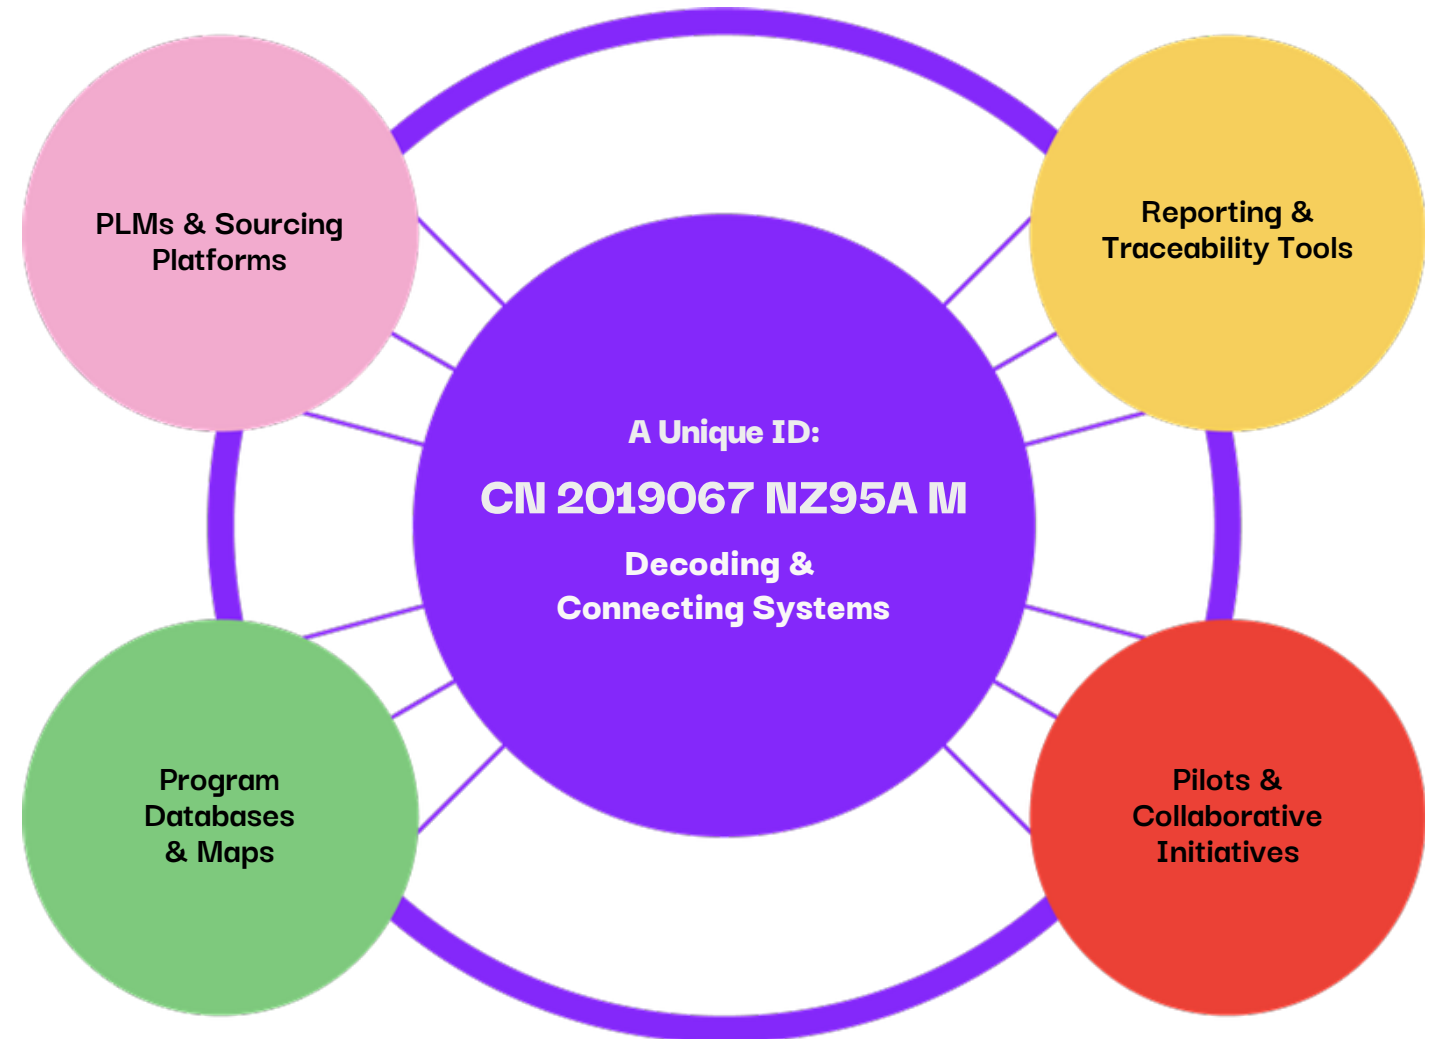

Brands & Retailers using OS Hub to share information and connect with suppliers

- adidas
 - Amer Sports
 - Amazon
 - Armani Group
 - Asda

Claiming your facility on OS Hub

What does it mean?

Claiming your production location on Open Supply Hub gives you a complete, credible and confirmed profile—with a green banner and Claimed badge—that helps buyers to trust and find you.

It's completely free and only takes a few minutes.

Claiming a profile also unlocks the ability to add key details including Certifications, Minimum Order Quantities (MOQ), Contact Information, and more.

Introduction to SLCP

About SLCP

Vision

Decent working conditions in global supply chains

Mission

To unite and support all stakeholders by developing and deploying a Converged Assessment Framework (CAF) that delivers harmonized, accessible and trusted data.

What is SLCP?

SLCP is a multi-stakeholder initiative that:

Implements the Converged Assessment Framework (CAF) to collect & verify social compliance data.

SLCP verified data is owned by the facility and can be shared with all business partners.

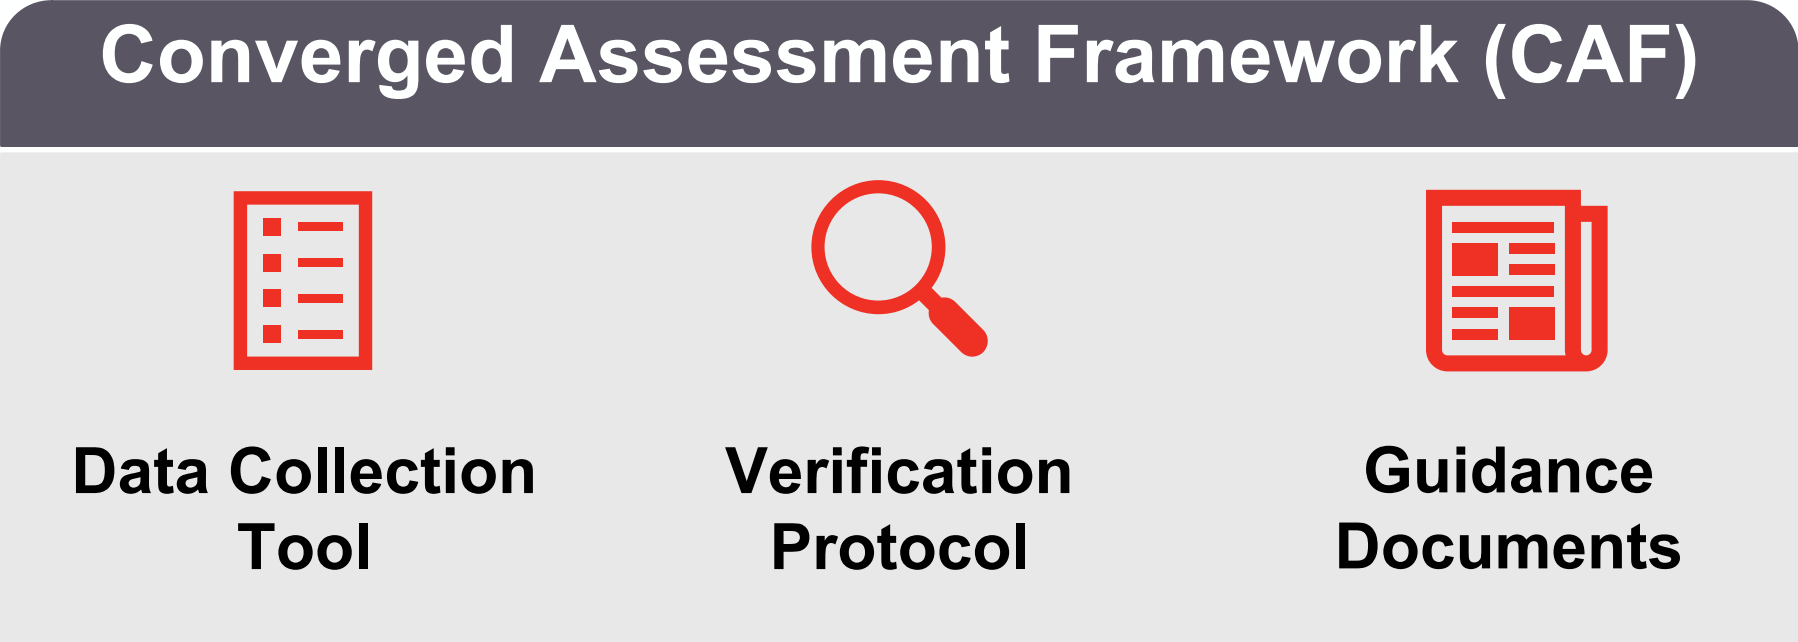

Replaces the need for repetitive audits and frees up resources for improvement programs.

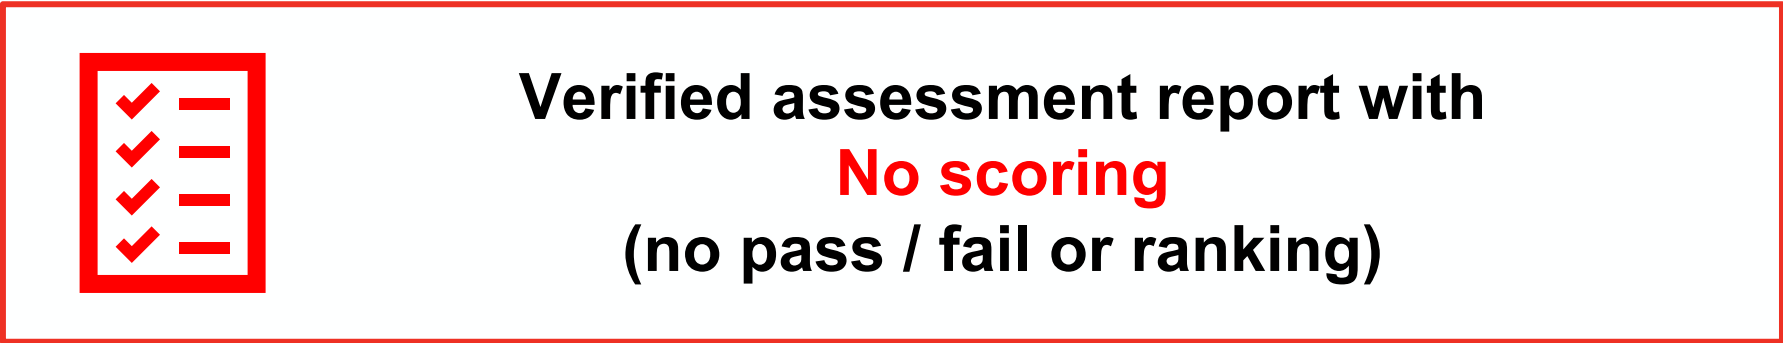

Provides credible data that supports end-users to meet due diligence requirements.

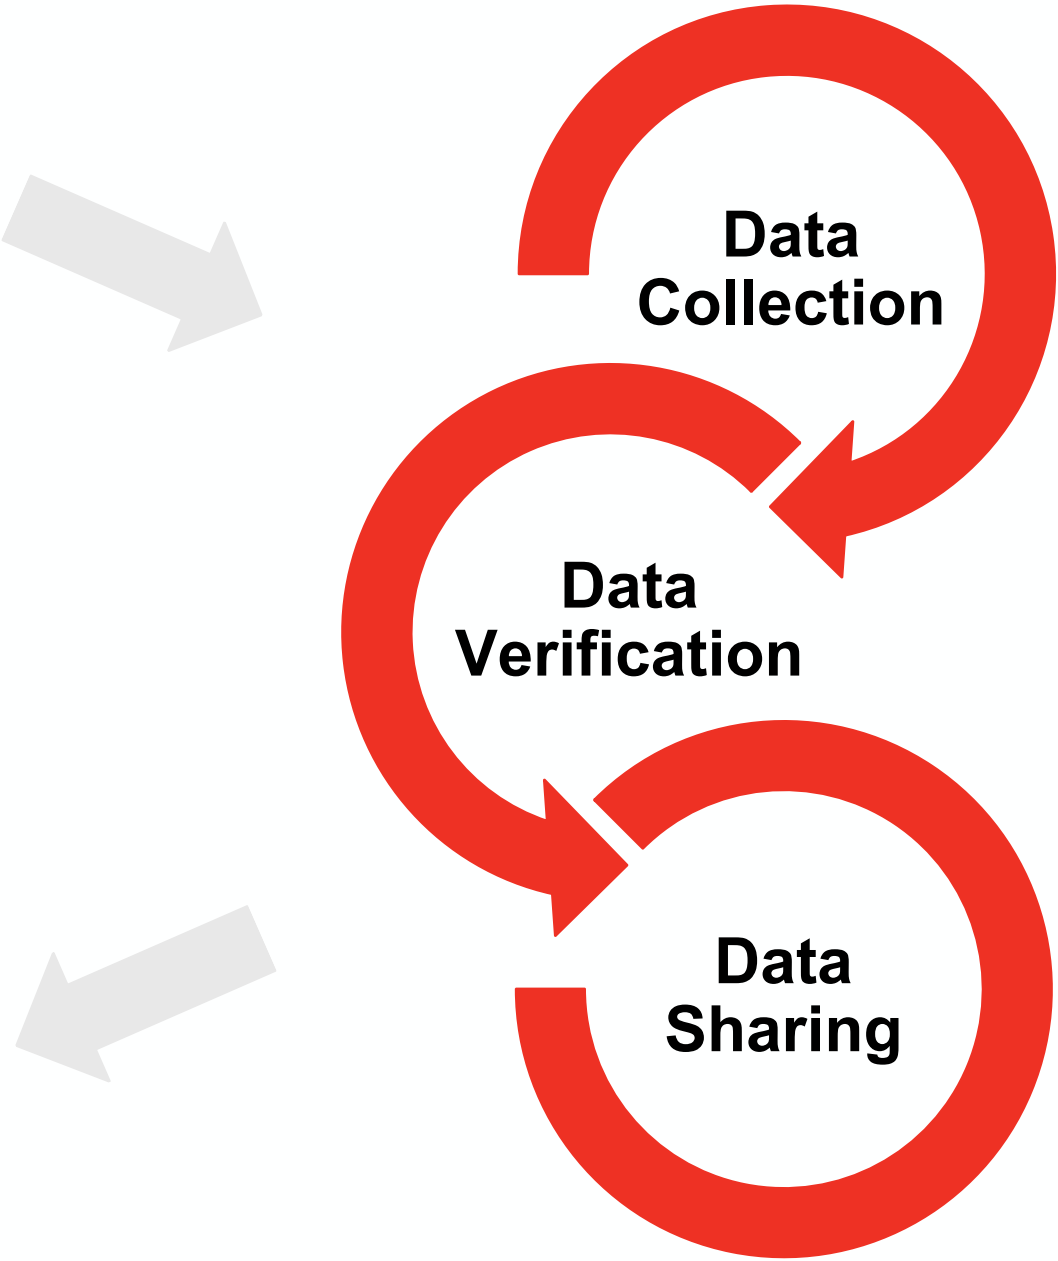

The CAF is used to complete the SLCP assessment process

The assessment process results in an SLCP verified assessment report:

The CAF is used to complete the three stages of the assessment process

A tool for all sectors

The Converged Assessment Framework (CAF) is suitable for use in most factory settings as the questions and data are:

- Globally applicable
- Comprehensive
- Aligned with OECD
- Aligned with ILO conventions and national labor law

The CAF has been used in diverse sectors including apparel, distribution centers, hard goods, and home furnishings.

What are the benefits of SLCP?

Reduces audit duplication & frees up resources

Widely applicable tool that provides a comprehensive data set

Provides credible data that you can trust

Offers a flexible data set compatible with multiple scoring systems

Facility-ownership model promotes equal partnership

Provides a common language to foster collaboration & drive improvements

[Find out more about the benefits of adopting SLCP here!](#)

100+ companies and organizations publicly accept SLCP Data

For more details, including which countries and tiers companies & organizations accept SLCP data from, please see the full list on our [website](#).

accepting SLCP

SLCP and OS Hub: How we work together

Our shared goal: Reducing data duplication & finding collaborative solutions to ease Human Rights Due Diligence (HRDD) burdens.

- To make HRDD effective, we believe in solutions that:
 - Encourage collaboration
 - Prioritize the needs of suppliers
- Over 8000 active SLCP facilities are matched to OS IDs and listed on Open Supply Hub.
 - This means that if someone needs details about a facility who has an SLCP assessment, they can look them up on Open Supply Hub using their OS ID

SLCP and OS Hub: Why should you get an OS ID?

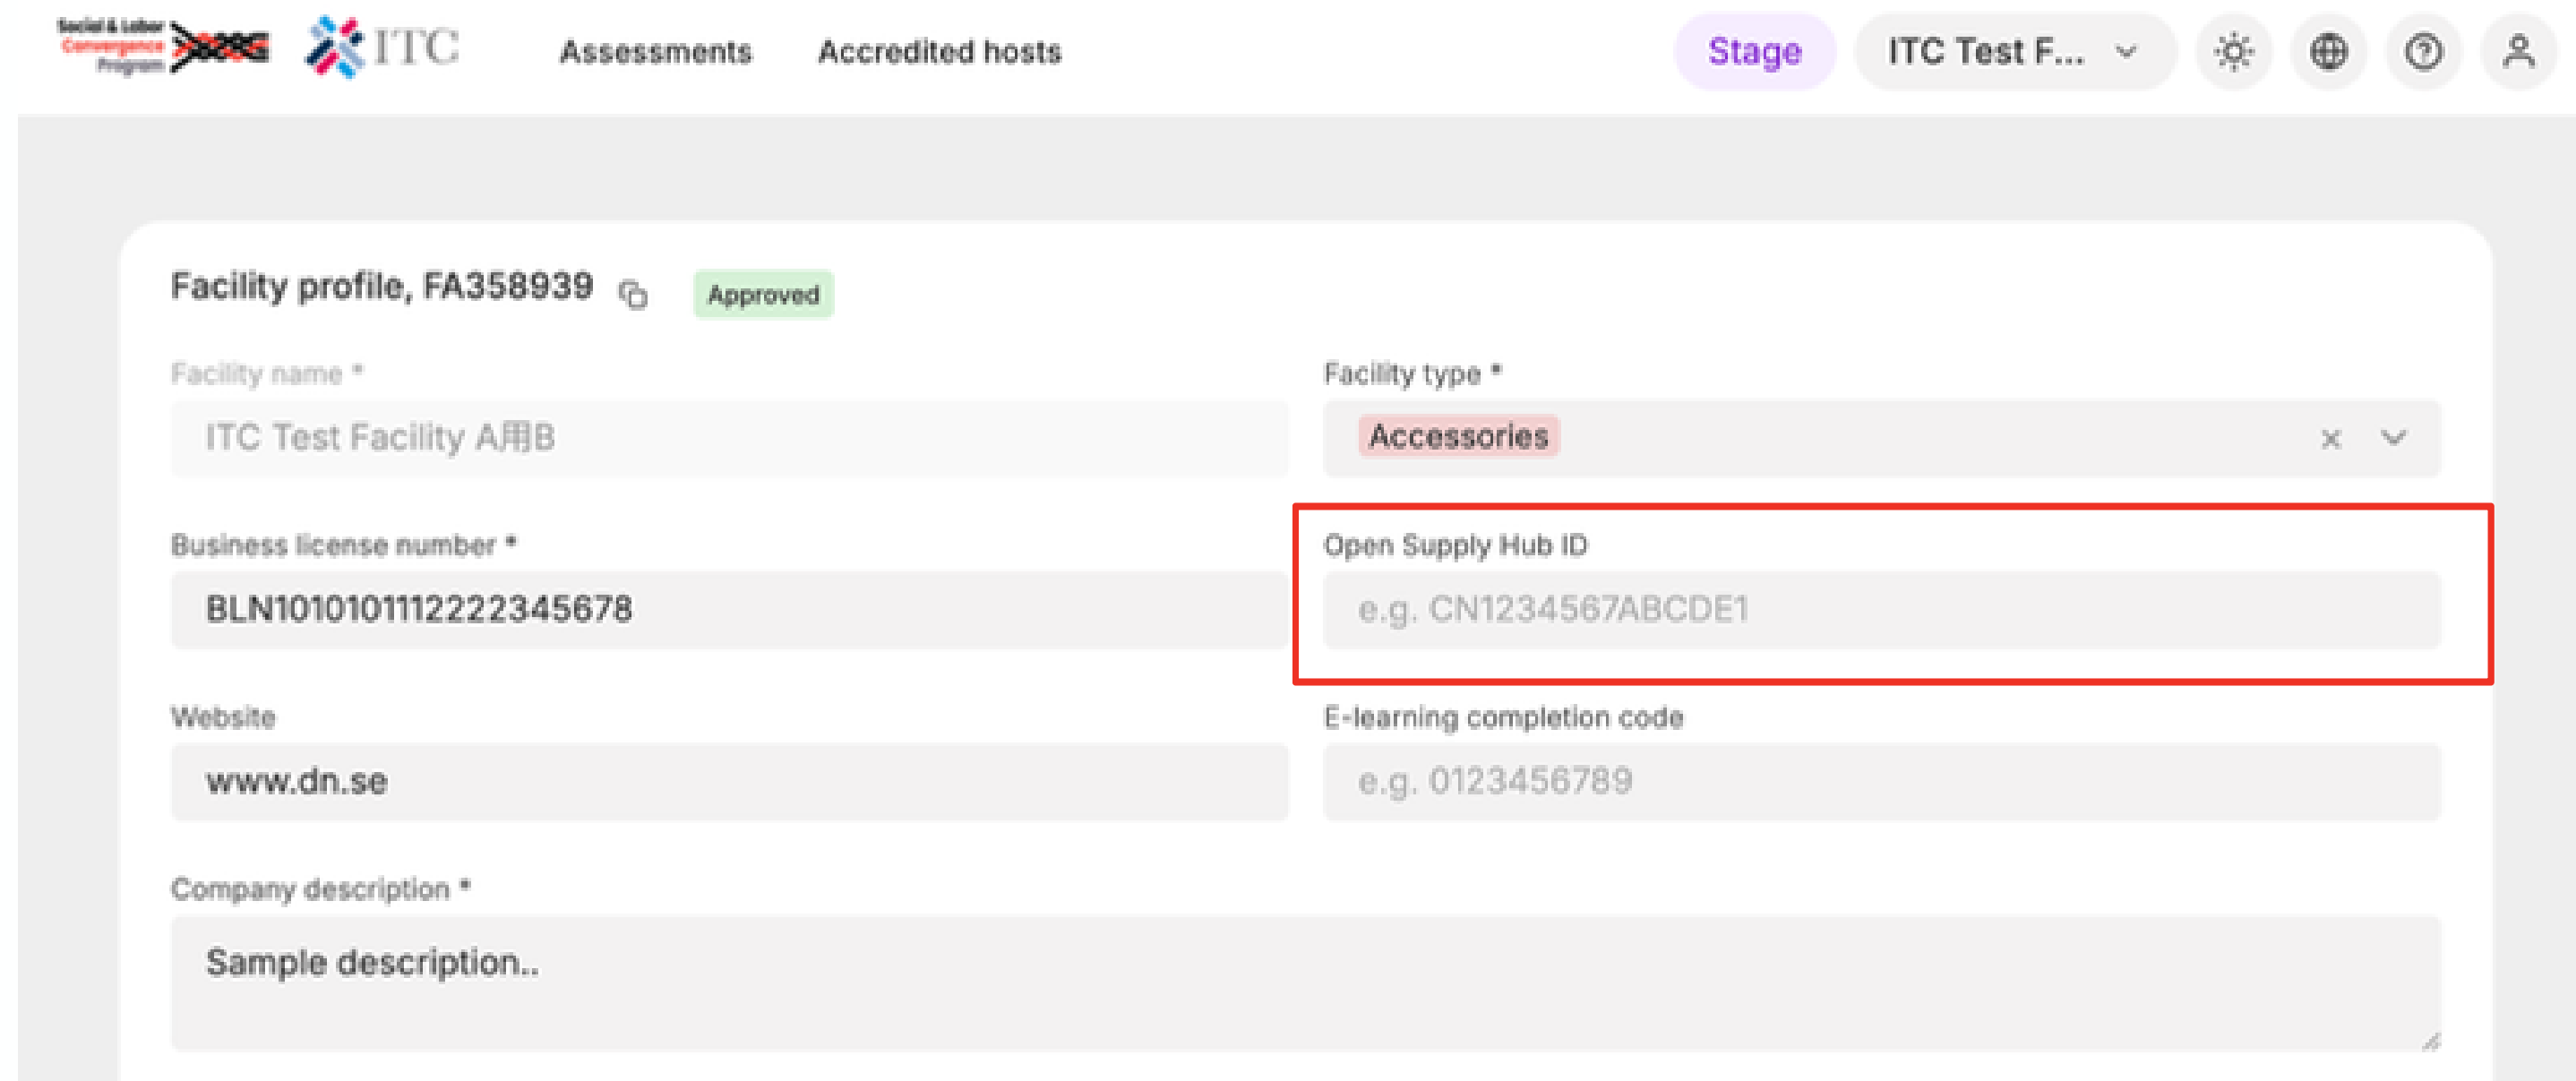

- It's **easier** for buyers to find you and request access to your SLCP data
- You may receive **fewer audit requests** and more data sharing requests
- Save time, money and resources
- Helps suppliers implement **effective HRDD** in practice
- OS Hub ensures **consistent identification** across platforms

SLCP facility map on Open Supply Hub, available online

Add your OS ID to your Gateway profile

Add your OS ID to your SLCP Gateway profile to easily identify your facility and connect your profile to your accounts on other platforms.

The screenshot shows the 'Facility profile, FA358939' page in the SLCP Gateway. The profile is marked as 'Approved'. The form contains the following fields:

- Facility name ***: ITC Test Facility A用B
- Facility type ***: Accessories (selected from a dropdown menu)
- Business license number ***: BLN1010101112222345678
- Open Supply Hub ID**: e.g. CN1234567ABCDE1 (This field is highlighted with a red box)
- Website**: www.dn.se
- E-learning completion code**: e.g. 0123456789
- Company description ***: Sample description..

SLCP and OS Hub: Example

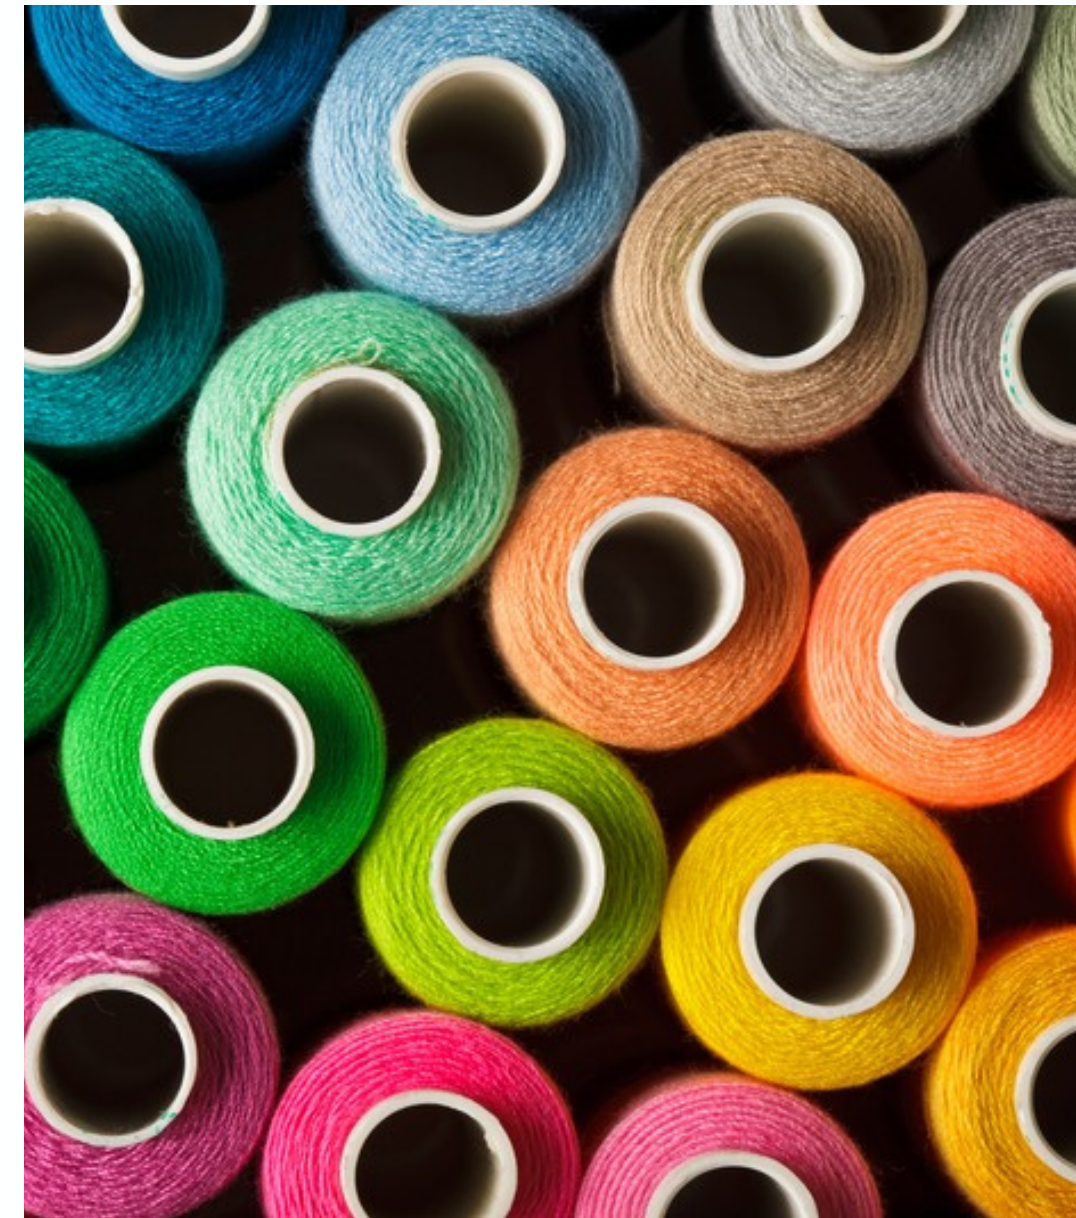

Cut & sew facility in Türkiye

- Facility is overloaded with audit and information requests
- Major buyer informs them they accept SLCP assessments
- The facility adds an OS ID to their gateway profile
- The profile can be shared with multiple customers, letting buyers request already existing, reliable HRDD data directly **instead of asking for repetitive audits or surveys**

By shifting from one-off assessments to SLCP's and OS Hub's shared, reusable data model, the facility:

- reduced audit fatigue
- freed up staff time for improvements
- provided brands with faster access to accurate information

SLCP and OS Hub: Impact of our partnership

Transforms HRDD
from reactive
compliance into
proactive transparency

Reduces audit
duplication and
audit fatigue

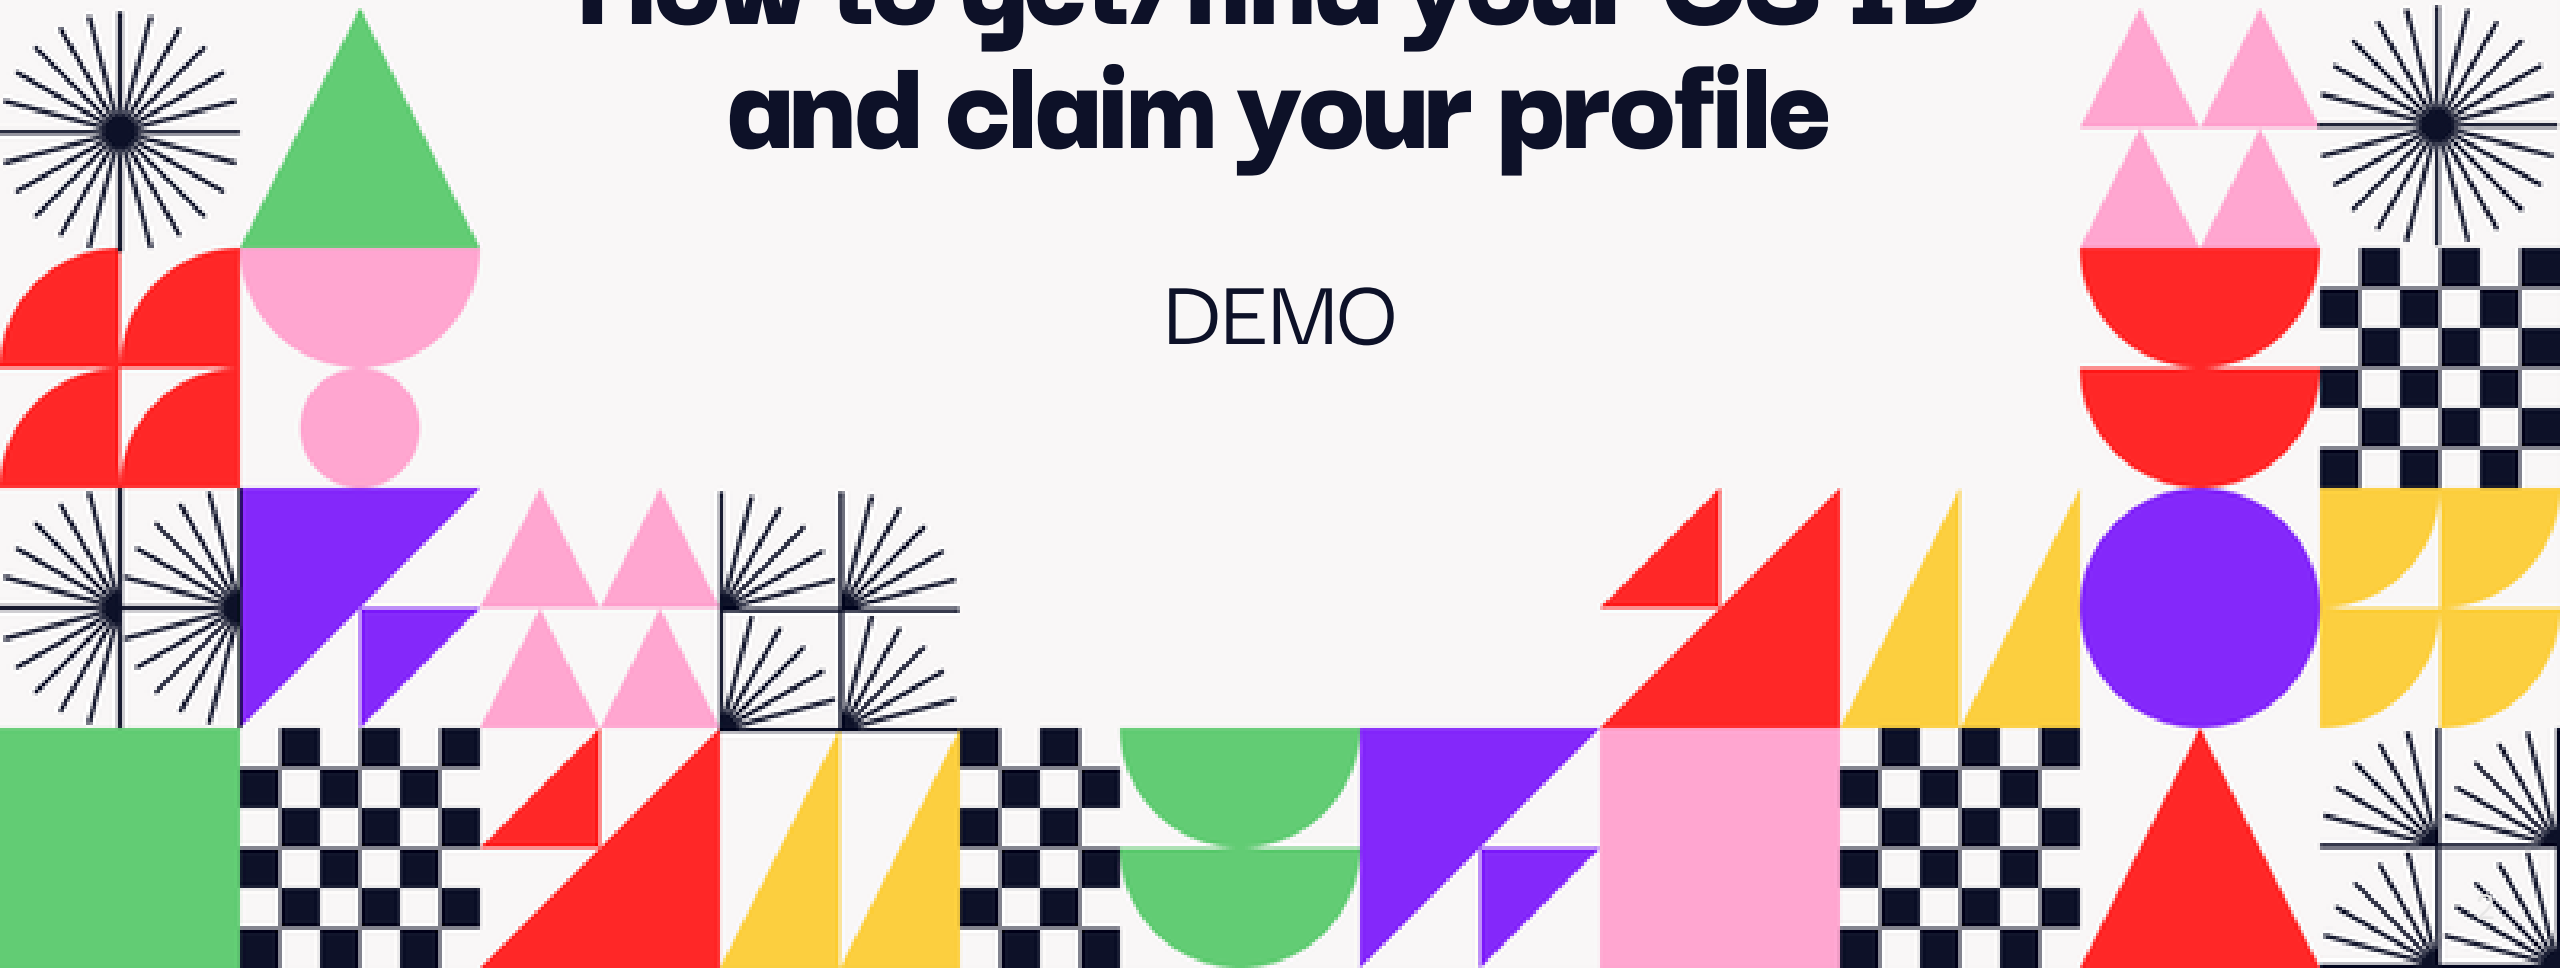

Speeds up access
to verifiable and
usable data

How to get/find your OS ID and claim your profile

DEMO

Turn Transparency into Opportunity

Save time and reduce repetitive work:

Use your [free OS ID](#) to store and share facility data once across all partners and platforms.

Connect your data across systems:

Link your [OS ID](#) to your [SLCP Gateway profile](#) to increase visibility and make trusted data easily discoverable.

Control your information and boost visibility:

[Claim your OS Hub profile](#) to own your data, showcase your strengths, and stand out to new partners.

What is Next?

Find Your OS ID: Search your site on OS Hub to learn your OS ID and see who has already shared data about you.

Update Your Details: Make sure your facility name and address are accurate and up to date.

Claim & Enrich: Claim your facility profile to add further details, making your information accurate and engaging

Connect with SLCP: Add your OS ID to your SLCP Gateway profile to link your data.

Explore for Opportunity: Start reviewing open supply chain data to find new clients, explore collaboration opportunities, and benchmark.

Support & Resources: Where to Get Help

- ✱ Explore the Facility Guide: Learn how to make the most of OS Hub.
- ✱ Book a 1:1 session: Ask your questions about finding OS ID and claiming your profile
- ✱ Learn from others: Discover how other stakeholders are using OS Hub to grow and collaborate.
- ✱ Access the Slides & Recording: Both will be available on our website after the webinar (link to be shared).

- ✱ Learn more about the SLCP assessment process via our Online Training Platform
- ✱ Review the quick guide for getting started with an SLCP assessment
- ✱ Explore the resources available on the SLCP Helpdesk
- ✱ The slides and session recording will be available on the SLCP Website after the webinar

Questions?

Thank you for your participation!

Please don't forget to share your feedback in
the short survey after the webinar.
