

More Control, Better Data: Claims Made Easy

MAY 2025

Today's Agenda

OVERVIEW

- ☼ How & Why Suppliers Use OS Hub
- ☼ Demo
- ☼ Case Studies & Testimonials

Data mirrors real life

The way we structure our data & what is built from that data is linked. To bring about real, systemic change, we need to shift both our data and our work:

From

CLOSED or EXCLUSIVE

SILOED & INCOMPLETE

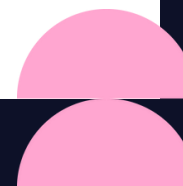

ENGAGING THOSE WE
KNOW

To

OPEN & ACCESSIBLE

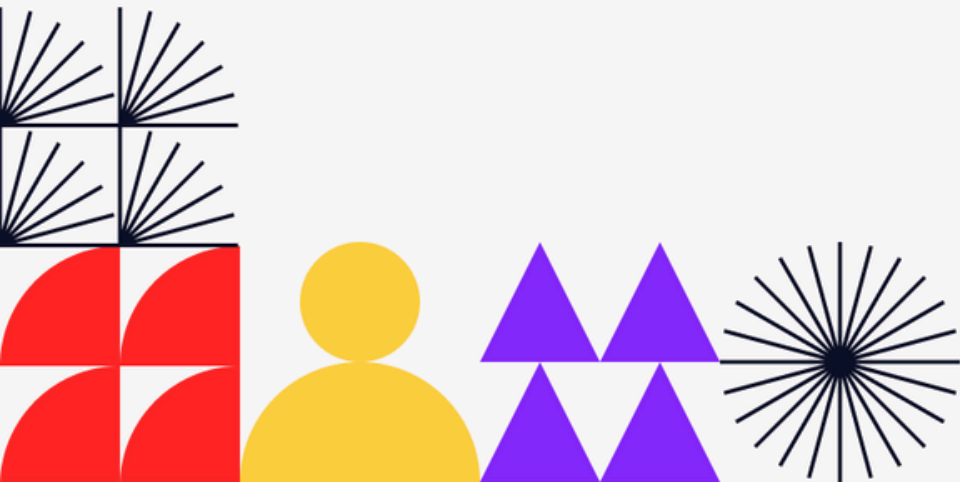

BUILT COLLECTIVELY TO
FILL IN EACH OTHER'S
GAPS

FINDING THOSE BEST
POISED FOR IMPACT

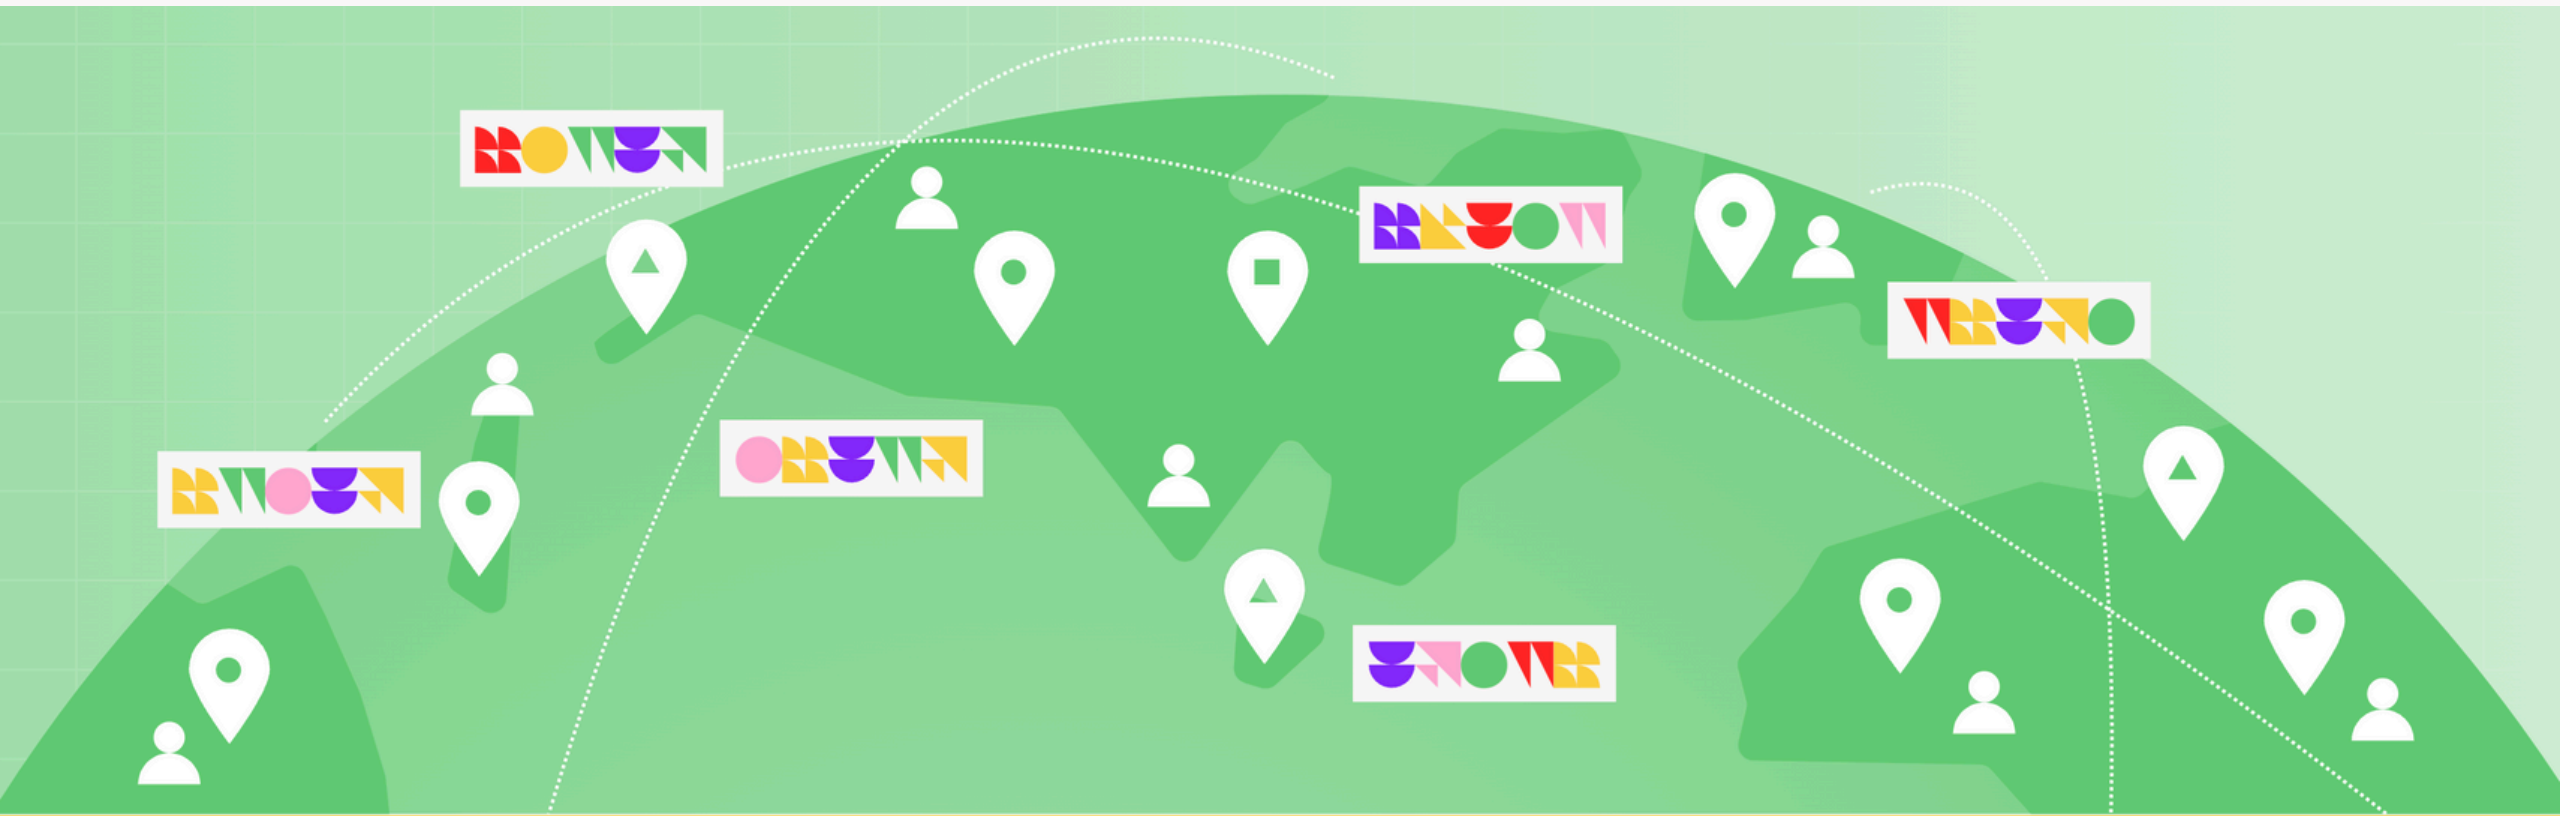

When everyone builds and works from the same base dataset together, countless opportunities can be unlocked.

Our platform shows where global production locations are and who is connected to them, and makes that data easy for **everyone** to work with. **Anyone can search and contribute to Open Supply Hub.**

Three Pillars Make It Work

Openness & Accessibility

No more hunting down different PDFs and spreadsheets & figuring out who has access to what. Everyone starts from the same base dataset & contributes to keeping it up-to-date & accurate.

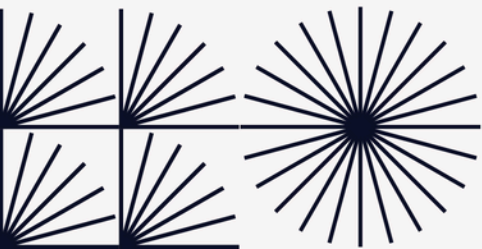

Standardization & Data Exchange

Using different formats & IDs makes it nearly impossible to connect & layer information. Get your data standardized & matched via the OS Hub algorithm & receive universal IDs for each location.

Engagement & Impact

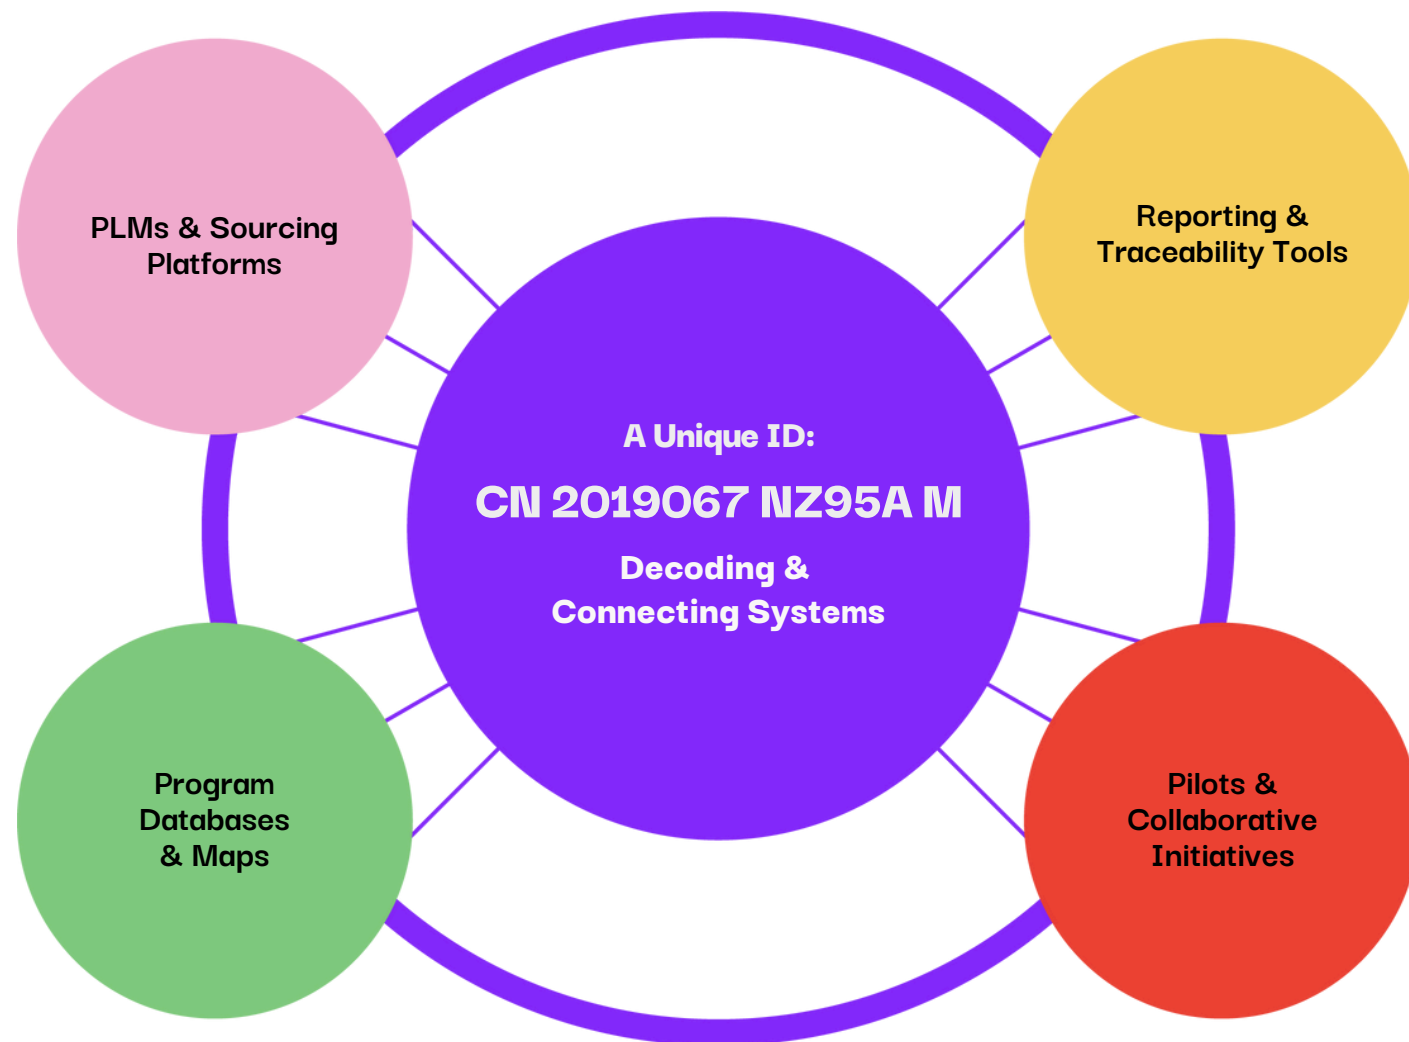

We can't solve problems we can't see & we can't collaborate with people we don't know exist. Find which organizations are connected to your region or supply chain to build solutions together.

WHAT IS AN OS ID?

Free & accessible production location ID for all sectors, stakeholders, geographies, and systems to live alongside location information, meta data and other IDs.

SUPPLIER - BUYER/STAKEHOLDER CHALLENGES

Suppliers

- Information request fatigue on multiple platforms
- Version control
- Indicating they want to be partners in due diligence/improvements
- Displaying progress they've made in one place
- Lack of control over where their data goes

Customers/Partners

- Need trustworthy, basic operational information, but not wanting to overwhelm suppliers with requests
- Figure out who suppliers are already working/partnering with
- Find suppliers best poised to work with them based on key datapoints

How OS Hub Can Help

Supplier Engagement

Open Supply Hub enables facility owners or managers to confirm their location name & address and then claim their facility. Once confirmed by OS Hub, the facility claimant can add more information about their operations with a check mark to show the data comes straight from the source.

A claimed profiles creates a free, open, single source of truth for basic information about that supplier - with data from other stakeholders alongside it. This means:

- **Better data for you**
- **Reduced burden on your suppliers**
- Ability to **collaboratively and openly trace your supply chain** alongside your suppliers.

DEMO

A dynamic, growing community

1,200,000+

OS IDs

Production locations listed
on OS Hub

1,750+

Data contributors

Brands/orgs/service providers
using OS Hub for data sharing &
collaboration

1600+

Claimed Profiles

Facilities/suppliers taking
ownership of their profiles

100+ platforms and organizations are incorporating OS IDs, including:

- ✱ Alliance for Water Stewardship
- ✱ Amfori (BSCI)
- ✱ BHRRC
- ✱ Bluesign Technologies
- ✱ Circular.Fashion
- ✱ CSR Hub
- ✱ Fairtrade
- ✱ Fair Trade Certified
- ✱ Fair Factories Clearinghouse
- ✱ Find Sourcing
- ✱ Higg/Worldly
- ✱ Labor Solutions
- ✱ Oeko-Tex
- ✱ SLCP
- ✱ Retraced
- ✱ Trustrace
- ✱ WikiRate
- ✱ ZDHC

“By being able to demonstrate the relationships of your facility through the affiliations visible on the site, and directing people to OS Hub as a verified resource, OS Hub serves to enhance trust between supplier and client.”

- ARVIND LIMITED

“Claiming your production location listing on OS Hub sends a clear message to potential customers and collaborators across the world: We are forward-looking, open to innovation, and keen to connect. Well worth the few minutes it takes to add and claim your OS ID!”

-JIEHUI KIA
